

# “You and HaveMoreDeer can make outdoors an exciting adventure!”

Just mix one 3.6 oz. Bottle of HaveMoreDeer with up to 200 lbs. of corn.  
Pour the corn mixture along fence rows, into a feeder, a hole in the ground or just pile mixture on the ground.

A 3 mph wind drives the scent 1/8 mile. You use the winds direction to attract deer to your property. Watch how fast deer find your corn. The proof's in these photos! Attracts deer year round! With repeat applications, deer will move their beds as close as possible to the area.
